INTRALOGISTIC CHALLENGES

Where are the materials and equipment I need to get my work done?

At industrial worksites, a significant amount of valuable time is wasted searching for materials, tools and equipment needed to get work done. Sometimes, when these items are not found, or are found to be damaged, they have to be purchased again—stalling production while awaiting delivery. These effects compound over time and can significantly hurt a project's timeline and budget.

INTRODUCING

Mobilaris Flow™

POWERED BY WITTRA IoT

Keep track of materials and equipment at industry and construction worksites – ensuring that works runs smoothly and is completed on time.

Mobilaris Flow™ powered by Wittra IoT is a product for industrial environments where things are sometimes hard to find. It collects and stores information on where materials and equipment are located and monitors their movement and condition over time. This allows your people to find items quickly and easily, and use them as intended when needed to maintain flow and keep your projects moving forward.

Indoor and outdoor materials and equipment tracking

Instantly find the location of materials, tools and equipment at your site. Experience superior visualization of information for easy navigation and status updates. All easily accessible through your smartphone.

Mobilaris Industrial Solutions and Wittra Networks in unique collaboration, combining unique expertise and leading technologies within IoT and positioning - together offering a pioneering cloud-based solution for materials, tools and equipment tracking.

Based on a hybrid positioning network, you'll get just the right accuracy to seamlessly trace your assets both indoors and outdoors. With Mobilaris Flow™ powered by Wittra IoT, you will save valuable time and keep your critical projects within time and budget.

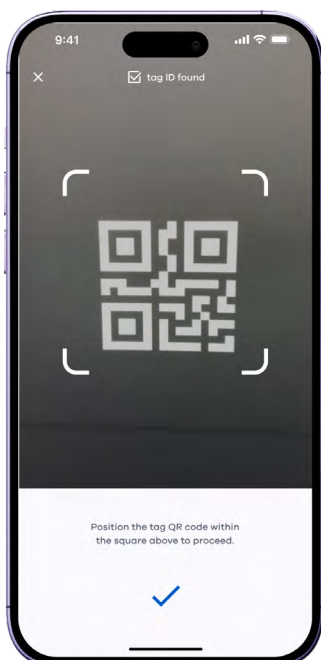

- ✓ **Production according to plan**
- ✓ **Improved capital utilization**
- ✓ **Reduced labour costs**

HOW IT WORKS

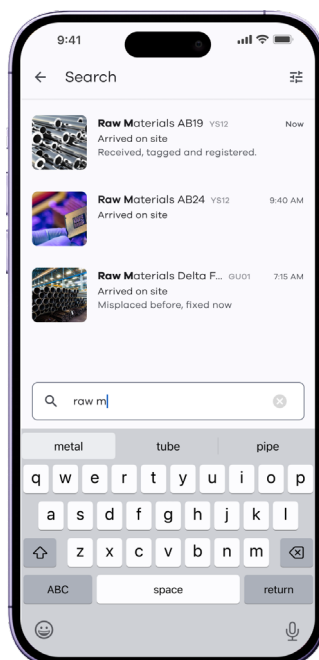

Tag. Search. Find.

Connecting and locating what you need to be able to find has never been easier. Simply tag the material with a sensor and if needed, attach photos for easy item identification and verification. Store the material at site and once you need to trace it, use the powerful search function that provides you with the location clearly visualized for easy navigation.

MOBILARIS
Industrial Solutions

Mobiclaris Industrial Solutions offers solutions that elevate productivity and safety through increased awareness and coordination of people, materials and activities in complex industrial environments.

The company's journey started in 1999, with pioneering use of telecom and real-time positioning technology. Since then, the products have been applied in various industrial environments around the world with high, proven impact. Today the focus is on solving safety and productivity challenges within heavy industry.

WITTRA Networks AB, a trailblazer in the Internet of Things (IoT) industry since its founding in 2013, has garnered substantial recognition in the IoT industry, receiving several prestigious awards.

With a technology portfolio safeguarded by 70+ patents, WITTRA is renowned for its comprehensive IoT solution, offering inventory visibility and real-time asset tracking that optimizes asset management and eliminates non-value-added time, even in challenging environments.
